

TT 550 Series
Vertical and Horizontal Bandsealers

The **TT 550 Series** vertical and horizontal bandsealers are used for applications that require full control and monitoring of sealing temperature for consistent seal integrity. The controls include an alarm and belt reversal system to ensure that any bags in process during the alarm state are expelled to the inlet side.

The **TT 550V** is ideal for products that may drain during the dealing process such as liquids or powders. It features adjustable supports on the belt that guide the package during the sealing process. The height of the unit can be adjusted to seal bags from 2½" to 11½" tall.

Standard Features and Benefits
TT 550V & TT 550H

- Temperature controller with digital readout
- Compact design with minimal footprint
- Auto-reverse conveyor on alarm
- Variable speed up to 400"/minute
- Fully adjustable integrated conveyor
- Emergency stop button
- Heavy duty construction
- Seal pressure is manually adjustable
- Seal temperature adjustable to 480°F

Specifications:	TT550 H	TT550 V
Seal Width:	5/16"	3/8"
Power:	120 VAC	120 VAC
Size:	24"L x 21"D	24"L x 14"D
Speed:	Up to 400"/minute	Up to 400"/minute
Operating Temperature:	Adjustable to 480°F	Adjustable to 480°F
