

Heavy Duty Medical Pouch Sealer

The **Med Pac** is a heavy duty floor standing sealer for applications requiring process validation of seals. The high pressure seal jaws, Suretemp temperature controller and operator controlled jaw selector switch work together to produce strong consistent seals, time after time.

Ideal for use in cleanroom or general medical environments, the validatable **Med Pac** is capable of sealing a wide variety of pouch materials including polyethylene, foil, laminates, and Tyvek.

Standard Features & Benefits MED PAC

- Cost effective, validatable, and flexible impulse sealers for medical and cleanroom applications.
- Choice of single sided sealing for lighter materials or biactive seals for foils, laminates, and heavier materials.
- Choose between models with seal lengths of 18", 24", 30", 36", twin head up to 60".
- Jaw selector switches allow the choice of heating with top, bottom, or both sealing jaws.
- Programmable controls and alarms for pressure and temperature, each with digital readout.
- Alarm system will abort cycle if pressure or seal temperature is out of preset range.
- Digital timers for each stage of seal and cool with 0.1 second increments from 0.0 to 9.9 seconds.
- Verification ports permit calibration and verification of seal parameters
- Ported Exhaust combines all exhaust air into one port for venting outside clean room
- Hands free foot switch activation.
- Lockable, clear control box cover ensures only authorized personnel change sealing parameters.

Specifications:

Seal Bar Length	18"-36", 60" twin head
Seal Width	5/16"
Electrical	115 VAC
LP Air requirement	110-120 psi
Dimensions	28"-63"W x 32"D x 58"H

Options:

Verification Timer	Bag Stretcher
Water Cooling	Lock swivel casters
Stainless Steel Workshelf	Stainless Steel Frame
